

Me and you are like this today. Oh my. It's def-- you'd have to take avocados. Yeah

You'd have to. Hi, I'm Tom Holland. I'm Zendaya. And we are here today to answer some IMDb fan questions.

What's the Best thing about playing spider-man and mj?

One of the best things about playing Spider-Man is getting to work with Zendaya.

One of the best things about playing MJ is getting to work with Tom Holland. Yes.

There's a bunch of things I could say. I think MJ, or at least our version of MJ,

is very special to me. But I love just kind of being able to take my time with the character.

I think something Jon has done really well is, like, we've really seen her evolve over time

and their love story evolve over time. So it's been nice to, like, see her grow as a character, you

know, from being very shy and guarded in the first film, to now kind of opening up and being a

little bit more-- Confident and out there. And maybe positive. Who would have thought?

Not me. I think, for me, with Spider-Man, what I love so much about playing this character is

the endless possibilities we have with the action sequences.

Anything that you can imagine doing as Spider-Man is something that George

Cottle and his team can recreate in the world of stunts. And also, you know, with our

amazing visual effects teams, it's just-- it's just kind of like-- you know, I remember, as a kid, I

used to use this app called Pivot where you could animate stickmen. Obviously, as boys,

all we would do is make them fight each other. So for me, getting to do that on

a much grander scale and spend hundreds of millions of dollars from Sony's pocket is really fun.

What's your favorite christma movies?

One of my favorite Christmas movies, and it is my favorite Christmas movie because I have

such a strong connection with it-- to it with my mum, is Just Friends with Ryan Reynolds.

I love that movie.
