

I think, for me, with Spider-Man, what I love so much about playing this character is the endless possibilities we have with the action sequences. Anything that you can imagine doing as

Spider-Man is something that George Cottle and his team can recreate in the world of stunts.

And also, you know, with our amazing visual effects teams, it's just-- it's just kind of like-- you

know, I remember, as a kid, I used to use this app called Pivot where you could animate

stickmen. Obviously, as boys, all we would do is make them fight each other. So for me, getting

to do that on a much grander scale and spend hundreds of millions of dollars from Sony's

pocket is really fun.

What's your favorite christmas movies?

One of my favorite Christmas

movies, and it is my favorite Christmas movie because I have such a strong connection with it--

to it with my mum, is Just Friends with Ryan Reynolds. I love that movie
